

Task 1: Where does our water come from?

When you look around, there is water everywhere. Seas, lakes, rivers, ponds, streams, reservoirs. It is a source of life. But where does it all start? How do we get a never-ending supply of water? You may remember some information about Rivers and Water Cycles from Year 3/4 which will help you with this unit.

Have a look at Task 1, to give you a better understanding of the rivers of the UK.

On the last slide is a video, use the link below to take you to the website:

Topic Template

w/b: 13/07/20

Focus: Geography - Rivers

Task 3: Features of a River

A river may look like a simple bit of water that just flows out to the sea, however, there are lots of interesting parts to a river...more than you could imagine.

Look through the PowerPoint and see if you can name the parts of a river. You will be surprised to see how many different parts there actually are!

Watch this video to get more information:

Task 5: How do we use Rivers?

As rivers are so powerful, they are a great life source for people around the world. However, not only that, they give so much to the human population/living world.

Find out more about how rivers give so much to our lives in Task 5.
